

**Bruneau Summer Cattle & Horse Allotment
Mountain City Ranger District
Humboldt-Toiyabe National Forest**

2016 ANNUAL OPERATING INSTRUCTIONS

I. INTRODUCTION

- **Permittee:** Marge Prunty Family Trust

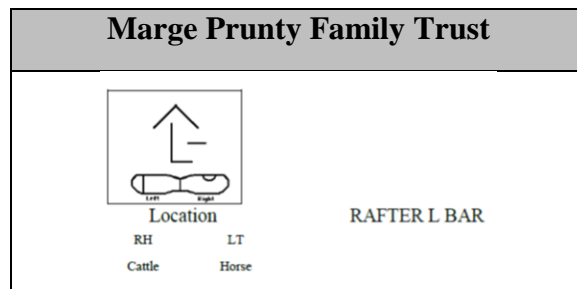

**BRUNEAU SUMMER C&H
PERMITTED USE**

Numbers/Class	Season of Use	Head Months
130 c/c	6/16-10/15	522

**BRUNEAU SUMMER C&H
AUTHORIZED USE**

Unit	Numbers/Class	Season of Use	Head Months
76 Creek	130 c/c	6/16-7/15	261
Camp Gulch		8/16-9/15	261
Non-Use			
Pack & Saddle Stock			

- Permitted Livestock Brands:

II. COMPLIANCE

- Upon signature, these Annual Operating Instructions supplement and are part of your Term Grazing Permit #__60130__consistent with Part 1, item 3 and Part 2, Item 8(a) of the General Provisions and Requirements.
- Situations may develop during the grazing season, which require changes to these instructions. If this becomes necessary, or if you cannot comply with some parts of these

instructions, contact the District Ranger and obtain approval before initiating changes or deviating from these instructions.

- Failure to comply with the terms and conditions of your permit and this instruction will result in permit action, which can include suspension or cancellation of part or all of your Term Grazing Permit.
- By USDA order 04-00-097, all non-pelletized hay, straw, or mulch possessed, stored, or transported on National Forest System Lands, in individual bales or containers, must be tagged or marked as noxious weed free or must have the original and current evidence of noxious weed free certification documentation present. All markings must meet the State and/or county standards for certification as noxious weed free.
- As a reminder, requests for nonuse of term grazing permits for personal convenience must be made annually by the permittee in writing sufficiently in advance of the start of the permitted grazing season, (normally 30 days). Full or partial permittee convenience nonuse may be approved for no more than three consecutive years and not more than four years in any ten year period. As the term permit holder, you are responsible for the maintenance on all assigned improvements on your permitted allotments during the nonuse period.

III. 2015 GRAZING RESULTS

IV. BILLING

- Grazing fees for 2016 are \$2.11 per head month and the unauthorized use fee is \$10.68 per head month.
- Payment of your grazing bill is preferably due five days prior to your earliest turnout date, to allow time for processing. As a reminder, the Forest Service is required to give permittees a minimum of 30 days to pay grazing fees. Placing livestock on the allotment prior to payment is non-compliance with Part 2, item 3 of the grazing permit and will be charged at the unauthorized use rate, and may include suspension or cancellation of the grazing permit.

V. LIVESTOCK MANAGEMENT

- Grazing System: Deferred Rotation with a rotation of the turn on pasture annually. This will be suspended as long as water resources are low in the Camp gulch area.
- Authorized use dates (turn-on & turn-off) are tentative and depend on range readiness, forage utilization and resource conditions during the entire grazing season. Livestock

remaining on the allotment past the authorized use date will be billed at the unauthorized use rate.

- Permittees are responsible for monitoring forage utilization within the allotment. Before allowable forage use rates are met in identified key use areas, livestock will be herded to another area or removed from the allotment.
- Owners of permitted livestock must comply with State of Nevada laws and regulations.
- Trailing: 45-50 horses will trail across the Mountain City Ranger District in the spring (from wintering on the BLM) to summer pasture on the Prunty Ranch and back to the BLM in the fall. The primary route in the spring is from the BLM in the Deep Creek area (T46N R56E Sec __) coming onto the District in the Diamond Creek C&H up to (southerly) the Anderson Canyon area. Then (westerly) into the Rattlesnake Canyon area to the Bruneau River Canyon road (FSR 067). At the Bruneau Canyon road, going southerly down the road to the Prunty Ranch in the Bruneau Summer C&H allotment. In the fall, this route will be reversed from the ranch to the BLM. Trailing times are from approximately MAY 25 thru JUN 5 in the spring and from NOV 11 thru NOV 20 in the fall. This is NO FEE trailing.

VI. HUMBOLDT-TOIYABE LAND AND RESOURCE MANAGEMENT PLAN (LRMP) STANDARDS AND GUIDES

- Allowable use is the degree of grazing specified for a particular area and/or plant(s). You are responsible for determining when allowable use has been reached. You should plan to move cattle to the next pasture or area in your rotation or off the allotment, before allowable use has been reached. This will be done regardless of the time remaining in the grazing season or how many Head Months you have paid for. If you need assistance determining use levels or identifying key areas, please do not hesitate to contact the Rangeland Management Specialist.
- Management will be directed toward having riparian areas in good or better ecological condition and stable or upward trend.
- Utilization is based on current year's growth for browse and shrubs. The utilization percentages represent the maximum that will be allowed based on current livestock practices and is measured as point in time. The following utilization standards will be the maximum utilization levels allowed for all herbivores on key vegetative species.
- **Amendment 2 of the Humboldt-Toiyabe LRMP Dated July 1990:**
 - The maximum utilization levels would normally be used only where the plant community is at or near the desired future condition.

- The listed value is the maximum rate which can be prescribed unless otherwise approved by the Forest Supervisor.
- In most instances utilization would be lower for the higher value management categories; however, this can vary according to ecological conditions and key species.
- Key species can vary by range site and management systems.
- Proper use based on utilization of shrubs will normally not exceed 35% of the current year's growth.
- Under the High Intensity short duration (early season), timing in relation to the period remaining for regrowth is key. The system is dependent upon sufficient regrowth to meet plant physiological needs and other resource values. Physical damage to the vegetative and soils resources needs to be considered.
- Sediment entrapment is essential to streambank restoration. If this is an objective at least 3-4 inches of herbaceous stubble height is needed on site during high flow periods.

ALLOTMENT: BRUNEAU SUMMER C&H

Category	Area Name	Key Species	Utilization
Class II	Bruneau River Copper Creek 76 Creek	Desirable grasses and Sedges	45%
Class III	Camp Gulch Springs & Seeps	Desirable grasses and sedges	55%
Class IV	Fawn Creek Badger Creek	Desirable grasses and sedges	55%
Class V	Union Gulch Miles Canyon	Desirable grasses and sedges	60%
Uplands	Allotment Wide	Idaho Fescue Bluebunch wheatgrass	60%
Upland Browse	Allotment Wide	Bitterbrush	50%
Riparian Browse	Allotment Wide	Willows	35%
Sagebrush communities	Allotment Wide	Desirable grasses, forbs & shrubs	55%
Aspen	Allotment Wide	Aspen	35%
Aspen understory	Allotment Wide	Desirable grasses & forbs	35%

Mountain mahogany	Allotment Wide	Mountain mahogany	30%
Upland mesic riparian sites	Allotment Wide	Desirable grasses & sedges	45%

VII. RANGE IMPROVEMENTS

- Range structural improvements will be constructed and maintained to facilitate proper use of the range resource.
- Range improvements must be maintained prior to livestock entering the allotment(s). Please be aware that it is necessary to plan projects with at least one-year lead-time to allow for the required documentation and clearances. Please work with the Rangeland Management Specialist to develop a schedule for large projects.

Project Name	Type	INFRA #	Location	Maintenance Responsibility

VIII. PERMITTEE INSTRUCTIONS

- Place salt or supplement at least 200 yards from water sources, trailheads, roads, and key areas. Salt will be removed before maximum allowable use levels have been reached and at the end of the grazing season. Salt fed in loose form shall be contained to keep it from spilling onto the ground. Salt or supplement will be removed from a pasture when the livestock are removed.
- Your assistance in locating noxious weed sites and reporting them to your Forest Officer is greatly appreciated. If you are able and willing to assist in treating noxious weeds, please work with your Forest Officer to determine how best to help.
- If you spot a wildfire, report it immediately to the interagency dispatch center in Elko, NV at (775) 748-4000.
- The permittee will insure that all personnel performing on the ground livestock management are thoroughly familiar with the terms of the grazing permit and annual operating instructions.

IX. REQUIRED REPORTING

- Enclosed is a Grazing Use Record for the upcoming season. Please use this form to record the dates livestock spend on the allotment, as well as other information such as livestock loss, grazing use, resource concerns, improvement needs/maintenance costs, etc. The grazing use record should be submitted to the district office by December 31, 2016.

X. INSPECTIONS & MONITORING

- Range Readiness- Livestock will not be placed on the allotment until soils are dry enough to prevent damage to vegetation or increase soil erosion and when key plants are phonologically ready to be grazed.

XI. COORDINATION & COOPERATION

XII. OTHER

- In case of any deceased livestock, notify a Forest Officer, determine the impact to the public, move out of water to the first flood plain, and away from trails, roads, etc.

XIII. MAPS, FORMS, & ATTACHMENTS

- You will find attached to your AOI a Grazing Use Record
